

CPR & First Aid in Youth Sports® Training Kit

PRODUCT INFORMATION

Product Overview:

The American Heart Association aims to equip youth sports coaches, parents, and athletes with the knowledge and skills needed to respond effectively in an emergency, both on and off the field. The user-friendly CPR & First Aid in Youth Sports™ Training Kit is specifically designed for youth sports coaches and their communities to learn lifesaving CPR techniques, how to use an AED, and how to provide life-saving assistance during sports-related emergencies.

CPR & First Aid in Youth Sports is designed to be taught in a single session and can accommodate up to 20 participants. The training includes 16 optional first-aid topics, allowing facilitators or sports organizations to select the content that best suits their needs. New in 2024 is the interactive web-based app that adds engagement and interactivity while providing feedback to the learner on the quality of their CPR practice. The kit is available in both English and Spanish.

CPR Course Content and First-Aid Topics:
