

Advanced Stroke Life Support® Blended Learning

The American Heart Association, in partnership with The University of Miami's Gordon Center, is excited to announce a new stroke education course for in-hospital and prehospital healthcare professionals.

The new Advanced Stroke Life Support (ASLS®) Blended Learning Course will educate healthcare professionals to identify, evaluate, and manage patients with stroke.

The International English (IVE) training materials have been adapted to include global stroke statistics, systems of care information, and metric units of measurement applicable to students outside the United States and Canada. Coming soon in Spanish.

WHO SHOULD TAKE THE COURSE?

This course is meant for any healthcare providers who interact with acute stroke patients and are looking to meet the education requirements for Stroke Center Certification.

COURSE OPTIONS

The new ASLS Course offers 3 provider course tracks:

Prehospital Provider Course:

- Highlights the principles of prehospital stroke management that make up the current standard of care, such as determining when to call a stroke alert and quickly transport the patient to the nearest appropriate facility
- Explains how to communicate the patient's symptoms, time of onset, and neurologic exam clearly and succinctly with hospital personnel

In-Hospital Provider Course:

- Focuses on the importance of an organized approach to treating stroke patients for improved outcomes
- Discusses the etiologic evaluation and secondary stroke prevention for stroke patients
- Describes the management of goals for acute ischemic stroke, intracerebral hemorrhage, and subarachnoid hemorrhage
- Outlines post-acute care management including supportive medical care, rehabilitation, and discharge planning for stroke patients

Advanced Stroke Life Support® Blended Learning

COURSE OPTIONS (continued)

Prehospital & In-Hospital Provider Course: Combines all of the components of the Prehospital and In-Hospital courses, and is best suited for healthcare providers who work in both environments, as well as ASLS instructor candidates that will be conducting the in-person skills testing for learners from both audiences

BLENDED LEARNING FORMAT

Blended Learning courses consist of both an online, self-directed portion, followed by an in-person skills test with an ASLS Instructor. In the online component, learners follow a continuously adapting learning path that is personalized by their own inputs, for not only their performance, but also their self-reported confidence levels. In-person skills tests will challenge learners to apply the skills and knowledge obtained from the online portion to correctly perform neurologic exams, diagnose, and manage patients with stroke.

INTRODUCTORY PRICING

IVE ASLS Online: Prehospital Provider	\$136.00
IVE ASLS Online: In-Hospital Provider	\$156.00
IVE ASLS Online: Prehospital & In-Hospital Provider	\$176.00
