

American Heart Association®

Center for Telehealth™

BASICS OF TELESTROKE COURSE: PRODUCT INFORMATION SHEET

About this course:

The American Heart Association (AHA) Center for Telehealth's Basics of Telestroke Course explores the impact of telestroke in healthcare, delves into the advantages of telemedicine in stroke management, and offers insights and best practices in telestroke care. Fully online and self-paced to meet students where they are, Basics of Telestroke provides engaging, high-quality content that fits any schedule.

Up to 3.0 hours of Continuing Education (CE) credit are available from this course when all modules are completed.

This course includes the following six (6) modules, available as a full course package or individually:

- Introduction to Telestroke
- Clearing the Hurdles of Telestroke
- Implementation Strategies
- Assessment of the Telestroke Patient
- Telestroke for Prehospital Providers
- Quality Measures and Reporting

Each module offers up to 0.5 hours of CE credit available for physicians, nurses, physician assistants and nurse practitioners to claim.

Who should register?

- Advanced Health Care Professionals
- Emergency Medicine Physicians
- Neurologists
- Stroke Coordinators
- Nurses
- Physician Assistants

About the American Heart Association Professional Education Hub™:

The Professional Education Hub is a new digital learning and continuing education (CE) platform for healthcare professionals from the leader in heart and brain health. This platform offers free courses, paid subscriptions, and other premium content, anytime and anywhere.

About the AHA Center for Telehealth:

Healthcare is complex; delivering optimal telehealth care doesn't have to be. The AHA Center for Telehealth leads connected care, keeping people at the center. As telehealth services become more common and accessible to patients, we offer providers standardized training to teach them how to appropriately and effectively provide telehealth services.
